KEY TERMS

CHANNELS

Each searchable collection in my-picturemaxx is called a “Channel”, and the complete list is in the “Channels” panel. Each media supplier offers one or more channels. When you select a channel and submit a search, your request is sent directly to the database of the associated media supplier.

ACCESS / ACCESS ID

Each user who wants to search or download files from my-picturemaxx must be associated with an Access ID for the picturemaxx Media Network. An Access ID is identified uniquely by its number. To use my-picturemaxx, a single Access ID must be selected. Media buyers who are members of the same project, desk, department or cost center are usually organized under one Access ID. Media suppliers can then manage permissions and determine invoicing based on this Access ID. The Access ID currently in use is always displayed in the title bar of my-picturemaxx, and on the top right of the screen. If a user has more than one Access ID, they can switch between them when needed. This allows a user to search and download under a specific project, desk, department or cost center.

PERSONAL PICTUREMAXX ACCOUNT

Every my-picturemaxx user needs to register a personal user account to log in to my-picturemaxx. Based on the registration, an administrator can grant permissions and control that user’s downloads. A personal picturemaxx account can be connected with several Access IDs (for example, from different employers, publications, or clients).

PICTUREMAXX MEDIA NETWORK

The users of the my-picturemaxx media search engine and its media suppliers together form a unique, international network of media professionals – the picturemaxx Media Network.
